## **DETAILED ACTION**

### ***Reissue Applications***

The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414.

The applicant has not provided a proper statement of at least one error in the declaration. There must be a specific reference to at least one error relied upon for filing the reissue. The statement provided is general and does not point out a specific error in a claim. See MPEP 1414 (II).

Claims 1-19 and 35-64 are rejected as being based upon a defective reissue Declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the Declaration is set forth in the discussion above in this Office action.

Claims 35-64 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not

Art Unit: 3769

present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to claim subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope of claim subject matter surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Claim 35 fails to recite the structure of the wand, position of the optical arrangement in relation to said wand, the form of the output laser beam, and the location of the electrical power supply in relation to said wand. Claim 41 fails to recite the form of the output laser beam, and the location of the electrical power supply in relation to said wand.

In the reply file on June 21, 1999, the applicant amended claim 1 of the parent application (08/971,880) and added the omitted structural limitations recited above to overcome prior art rejections.
